

# The Gustave Eiffel University on an outing to Paris

To conclude the English cycle, the promotion of the professional licence tourism and sports leisure went to Paris to carry out original activities around the district of Châtelet.

It is with a bright sunshine and a powerful cold, and a Paris city still asleep that the 22 students and the incredible teacher Mrs Vanessa Pierre met for a first animation: it's time for a race against the clock dotted with riddles in the surroundings of "Châtelet", the "Paris Express". The first group rallied the Stravinsky Fountain, the Saint-Eustache church and the Pompidou center in less than 20 minutes while answering all the riddles!

The, the group of students wearing the college T-shirts headed to the Buren works columns located in the courtyard of the "Palais Royal" to achieve a Power 4 on a human scale! One correct answer to a hard question, and the team could place a player to try to line up 4.

After an exciting and suspenseful game, the team headed to the "Cour Carré" at "the Louvre" to play a game of speed and observation linked to the history of the Kings of France. The groups had to find architectural elements on the facades of the buildings and then take pictures of them to score the point!

Finally, the last exciting and sporting activity through the historic streets of the capital: a photo rally. Combining strategy, speed and responsiveness, the teams took original photos in front of Molière's birthplace, the Admiral Coligny monument, the church of Saint-Germain l'Auxerrois and the Louvre Pyramid.
